HOMEOWNER CHECKLIST

- Replace your furnace filter
- Check attic, basement, and crawl spaces for leaks or moisture (consider getting a moisture meter for areas of concern)
- Check your humidity levels and turn down (or turn off) your furnace humidifier
- Check gutters and downspouts for debris
- Check the caulking around windows and doors to ensure there is no water leaking; add more sealant if there are gaps
- Clean your window screens and make sure windows are operating properly
- If you have a septic system, clean and maintain it regularly
